

Product Name :
Energy Drink Filling Machine**Product Code :**
FOOD-BEVG0003**Description :**

Energy Drink Filling Machine

Technical Specification :

Our energy drink filling machine line integrates bottle rinsing, filling and capping machine into one monoblock machine. The three processes are carried out fully automatically. Filling in PET bottle or glass bottle or can bottle all can be customized.

The machine elements that contact with the liquid is made of high quality stainless steel, The critical components are made by numerically-controlled machine tool, and the whole machine condition is under detection by photoelectric sensor. It is with advantages of high automation, easy operation, good abrasive resistance, high stability, low failure rate, etc.

We can also equip the drink production line with water treatment equipment, pre-treatment mixer equipment system, and the packing system including shrink sleeve labeling machine, shrink packing machine etc.as one complete line.
