

Product Name :
Glass Bottle Liquor Filling Machine

Product Code :
FOOD-BER0006

Description :

Glass Bottle Liquor Filling Machine Line

Technical Specification :

Our Liquor filling machine line integrates bottle washing, filling and capping machine into one monoblock machine. The processes are carried out fully automatically.

The machine elements that contact with the liquid is made of high quality stainless steel, The critical components are made by numerically-controlled machine tool, and the whole machine condition is under detection by photoelectric sensor. It is with advantages of high automation, easy operation, good abrasive resistance, high stability, low failure rate, etc.

We can also equip the beer production line with water treatment equipment, pre-treatment mixer equipment system, and the packing system including shrink sleeve labeling machine, shrink packing machine etc.as one complete line.
