

Product Name :
Oil Filling Machine Line

Product Code :
FOOD-OLM0007

Description :

Oil Filling Machine Line

Technical Specification :

This filling machine line is for filling high viscosity liquid or material like oil, jam etc. This is linear filling line, which can be integrated with feeding table, filling machine, capping machine, date printer, labeling machine as one complete line.

Accurate Volume: Servo system is applied ensure the high accuracy of the filling volume.

Changeable Speed: The filling speed will become slower automatically when approaching the intended volume.

Submerged Filling: Filling nozzles will submerge in the liquid while filling to avoid foaming and spilling.

Intelligent Adjustment: You only need to change the parameters on the touch screen for different filling volume or even fine tuning. All filling heads can be adjusted. It has user-friendly interface and is really easy to operate.

Pollution-free: The main frame of the machine is made of high-quality stainless steel 304 with good anti-corrosive effect. All contacting parts are made of stainless steel 316L. The whole machine is sealed with stainless steel and toughened glass so that waste gas leak will be prevented.
