

Product Name :
Honey Filling Machine**Product Code :**
FOOD-FMC007**Description :**

Honey Filling Machine Line

Technical Specification :

This filling machine line is widely suitable for high viscosity materials filling capping and labeling. We can equip the whole line from bottle feeder till bottle collector with the complete honey production line.

Bottle turning table feeder and honey bottle filler are intergrated in one machine. Our machine is fully automatic and have scientific and reasonable design. Also with nice appearance and complete functions, it's easy to operate and maintain.

Bottle changing is easy. There is no need to adjust the height of machine through neck holding for bottle transportation. Only need to change the spare parts.

The bottle goes through filling and capping with little abrasion. High speed filling valve assures high speed and exact liquid level control.

We all use 304 stainless steel or food level material to ensure the high quality of our machine. PLC control system is used and electric parts are using famous brand like Mitsubishi Siemens Schneider and so on.
