Automatic Meat Patty Machine**Product Code :**
FOOD-MET0057**Description :**

Automatic Meat Patty Machine

Technical Specification :

This patty machine is suitable for small to medium size production of hamburger, chicken nuggets, chicken, beef steak, pumpkin patty, etc. It is also good for seafood such as fish and shrimp, and Vegetable products like pumpkin, potato, cheese and other sticky type products.

One key feature of this machine is the wire that allows product not to stick on the mold plate during production, thus increasing productivity. This Patty machine also works very well with prepared food lines when connected with the battering machine, preduster, frying machine, cooking machine, instant freezer, and packing machine, sharing the features of high production capacity and stable quality.

Endless patterns can be customized for various products such as round, square, ellipse, triangle, heart, and some other patterns such as cartoons.

Features:

Machine come with one mold included in price

It is automatic

With conveyer

With self-cleaning wire (Optional). Air compressor of 6-bar is required for self-cleaning operation.

Works well with sticky products and is ideal for veggie burgers

Has the capability to add paper. With a flip of a switch customer has option to add the paper. This option comes included with the machine.
