

Product Name :
Meat And Bone Grinder**Product Code :**
FOOD-MET0058**Description :**

Meat And Bone Grinder

Technical Specification :

Through the careful research and innovation of food machinery experts, our factory has successfully developed a new type of multi-functional all-in-one bone-slime machine, which has won five national patent certificates, including two invention patents. meat and bone grinder has reached the latest technical level at home and abroad, bone grinder machine can directly grind all kinds of materials (materials do not need pre-grinding) into a variety of bone mud, meat mud, skin mud, shrimp paste, crab paste, fish mud, peanut butter, sesame paste, jam, chili sauce, bean paste, etc. meat grinder for bones Can also grind bone powder, Chinese medicine, spices aniseed and other products.

This machine is based on the existing model of our factory, after more than two years of development and innovation, the successful development of innovative upgrading products. bone crusher grinder machine not only can grind bone mud, but also can ground fresh meat. it Widely used in the production of various sausages, ham, meatballs, fish balls, meat patties, canned lunch meat, steamed stuffed bun, dumplings, soup, soup base soup, instant noodle seasoning, flavor, spices, feed, pet food, biological health food, biological pharmaceutical, Chinese medicine and other products. The products made by grinding the bones of poultry and livestock into meat puree and adding them into food have delicious taste, unique taste, fresh and tender color, rich meat flavor and calcium intake in delicious food, easy calcium supplementation, rich in high-quality protein and amino acid, etc.. Stuffing into meat products also reduces product costs and increases production rates. Can replace part of lean meat, starch and edible gum, can increase the elasticity of the product, so that the product delicate tissue.
