

Product Name :
Automatic Milk Filling Evaporated Milk Processing Machine

Product Code :
FOOD-DPM0001

Description :

Automatic Milk Filling Evaporated Milk Processing Machine

Technical Specification :

The machine has compact structure, complete control system, easy operation and high degree of automation
To change bottle shape, the operator only needs to replace the star-wheel, inlet bottle screw and arc guide plate
The parts contacting media are made from 304 and have no process blind angles to enable easy cleaning
High speed filling valve, guarantees liquid has precise level and no waste is incurred

The capping head applies a constant magnetic torque device to secure capping quality and prevent damage to the bottle cap

The control system has the function of control producing speed, cap shortage detection, bottle block auto stop and production counting

The machine applies a highly effective cap arranging system that has complete self control and protective device

The machine is equipped with a complete overload protection device that can secure equipment and the operator effectively

Main electric components and pneumatic components apply world famous brand products

The machine's operation is controlled by an advanced touch-screen
