

Product Name :
Fruit Sorting Machine**Product Code :**
FOOD-JCE0001**Description :**

Fruit Sorting Machine

Technical Specification :

Adopting high quality stainless steel shafts and stepless speed adjusting device.

Our sorting sorters are made of stainless steel folding plate of 1.5mm.

The support and beam are welded by stainless steel tube.

The transmission shaft and chain wheel are made of stainless steel 1Cr13.

The smooth surface of the stainless steel shafts pose no damage to the surface of fruits.

Unique motor guarding shield and grounding type oil guiding pipe provide a more sanitary condition for the sorting and grading of fruits.

Production Capacity: 5 tons/h

Transmission Width: 700 mm

Transmission Length: 4000 mm

Power: 1.1 kw
