

Product Name :
Juice Pasteurization Machine

Product Code :
FOOD-JCE0009

Description :

Juice Pasteurization Machine

Technical Specification :

The drinks and heating medium are in separated zones. They exchange heat without contact. This design ensure the cleanness of drinks.
The sterilization time is quite short, so the nutritive content and property will not be destroyed.
The complete machine is made of food-grade stainless steel, which can meet the international standard on food and drink equipment.
High heat transfer effect, high heat recovery, low heat waste, and low power consumption.
The main control elements, valves and components adopts imported products. They has long working life.
Adopts PLC control device. Automatic control of heating temperature and steam flow. Besides, the automatic fluid returning system ensures 100% sterilization effect.
