

Product Name :
Juice Filling Machines

Product Code :
FOOD-JCE0010

Description :

Juice Filling Machine

Technical Specification :

Compact structure, efficient control system, easy operation, high automation.

All parts that connect with fluid are made of food-grade stainless steels. With no dead angles, it is easy to clean. It adopts constant high-speed filling values. They can achieve accurate liquid level and no splash.

The sealing part adopts magnetic constant torque device. It can ensure the sealing effect with no harm to the bottle caps.

With effective overload protection device, it can ensure the safety of the operator and equipment.

The PLC system has the function of production speed control, lack-cover detection, bottle-jam stop, etc.

Main electric components and pneumatic elements come from world famous brands.

Equipped with touch screen controller, convenient operation.
