

Product Name :
De-Stoning Machine

Product Code :
FOOD-POT0002

Description :

De-Stoning Machine

Technical Specification :

It removes stones and other foreign objects.

It prevents damage to other equipment.

It incorporates a pre-washing process.

This machine pre-washes the potatoes to remove dirt, stones and foreign objects.

It incorporates a hopper filled with water that receives the potatoes and uses suction to separate the potatoes so that foreign objects are unable to enter the equipment.

It feeds into the potato peeler.

Heavy elements fall to the bottom by decantation. It incorporates a hatch for easy cleaning.
