

Product Name :
Abrasive Peeler Centrifuge

Product Code :
FOOD-POT0003

Description :

Abrasive Peeler Centrifuge

Technical Specification :

The centrifugal action abrasive peeler washes and peels potatoes in automated cycles. The potatoes are automatically fed in batches after previous reception and washing. Once the cycle is finished, potatoes are extracted for inspection and go to the next stage of the process. The disc, core and housing are easily disassembled for replacement of the abrasive lining.
