

Product Name :
Inspection Roller Conveyors

Product Code :
FOOD-POT0004

Description :

Inspection Roller Conveyors

Technical Specification :

Inspection roller conveyors stainless steel.

Transmission in this inspection roller conveyor is chain-driven and on free rollers mounted on rubber-lined tracks allowing product to rotate during the transportation along the belt.

This movement makes the product to rotate on itself along the belt allowing a visual inspection on all sides of the product.

Adjustable height, dimensions and speed according to product needs.
