

Product Name :
Cup Filler Machines**Product Code :**
FOOD-FLM0003**Description :**

Foodprocessing-machines is a renowned name for the best quality cup filler machines manufacturers, suppliers, and exporters. We have been delivering top-notch quality to deliver the best products right on time and in perfect condition. We make sure to put in our best efforts so that the outcome is just as you like it. We design it with clear engineering and complete carefulness so that the outcome is satisfactory and impressive. Our team closely looks into the whole production and manufacturing process of cup filling machine so that no scope of error is left. Some of the best features of our cup filling equipments are stainless steel, high quality, and efficient outcome. Our team has been well experienced in this field for years and knows everything about it. Our team has been covering a wide range of varieties while working in this industry, including developing simple tools, basic industrial instruments, and complex machinery. We cover all types of cup filling work ranging from water, soda, ice cream, drinks, and a lot more. Foodprocessing-machines is a synonym for the best cup filling equipments manufacturers, suppliers, and exporters. The best part about our products is, they meet all the requirements regarding delivery, quality, and efficiency for all products and deliver only perfection. We have been trained to deal with all kinds of situations such as emergency requirements, urgent supplies, and bulk orders. If you want to know more about our products, team, or raise a query, then turn to our executives at the earliest.

Technical Specification :

Fully Automatic Chute Bagger
Cup Filling System
Speed upto 40 bags/min
Range available 10gm to 500gm
Different pouch widths can be packed by
changing the forming chute
Suitable for free flow material with consistent
bulk density

Weighing Range: 10-50gm
Speed (Bags/min): 30-40
Power Supply: Single / Three Phase
Load: 3.5 KW
Parameter Setting: Via Keyboard
Contact Parts-Stainless Steel
Compressed Air: 150 LPM Approx.
