

Product Name :
Fruit Mill Crusher Hammer Crushing Machine

Product Code :
FOOD-TOM0008

Description :

Fruit Mill Crusher Hammer Crushing Machine

Technical Specification :

Owing to the efforts of our skilled professionals, we have been constantly engaged in offering a qualitative assortment of Fruit Crusher Machine. The offered equipment is widely used in food processing industries. Using high quality components and advanced technology, the provided equipment is manufactured under the stern vigilance of our deft professionals. To ensure its functioning, this equipment is precisely checked by our quality auditors on different parameters as per the set industry standards.

Features:

- Precisely design
- Can withstand high temperature
- Long operational life
- Reasonable cost

Other Details:

We offer fruit mill, which is high on performance and highly efficient. Our fruit mills are manufacturing from high grade stainless steel.

These fruit mills are used for crushing of fruits to extract juice and pulp of fruits like papaya, tomato, etc.

Fruit mill same as fruit crusher, this machine is mainly used in tomato processing equipments.

This product is kept before the pulper to decrease the load from pulper

Our fruit mills are available in the capacity range of 0.5 ton/hr to 2 ton/hr.
