

Product Name :
Mineral Water Filling Machines

Product Code :
FOOD-MWTR002

Description :

Mineral Water Filling Machine China Manufacturer

Technical Specification :

The automatic drinking water filling machine consists of three parts: cleaning, filling and capping
The design concept of the machine shortens the contact time of beverage materials with the outside world, and improves the sanitary conditions of the entire economic benefit.
The bottle feeding method is directly connected with the air conveyor and the bottle tray.
All 304/316 stainless steel flushing head, spray water injection design, save water and clean.
304/316 stainless steel holder with plastic pad to ensure that the bottle collision is minimized during the washing process.
304/316 stainless steel cleaning pump makes the machine more durable.
