

Product Name :
Can Filling Line Machine

Product Code :
FOOD-CFM0003

Description :

Can Filling Line Machine China Manufacturer

Technical Specification :

The advanced Siemens PLC is adopted to control the machine to run automatically. Omron sensor is used in the can entering chains to adjust speeds and coordinated with the transducer of the main machine to make the operations of moving bottle forward steadily and reliably. It is convenient to operate with higher automation because every part of the machine is inspected to run with sensor.
